

PROJECT SOUTHEAST ASIA

Reconstructed Sell-Side Review — AkzoNobel Southeast Asia Decorative Paints

Independent Student M&A Case Study | September 2026

Independent student analysis/reconstruction based on publicly available information. Not affiliated with, commissioned by, or representative of Goldman Sachs or AkzoNobel.

AkzoNobel reviews a sale of its EUR300m Southeast Asia decorative paints platform

Seller	AkzoNobel N.V. (market cap ~USD 12.5bn; FY2025 group revenue ~USD 11.5bn)
Reported Adviser	Goldman Sachs
Assets Under Review	Decorative paints operations across Indonesia, Thailand, Malaysia, Vietnam
Reported Revenue	EUR 300m (~USD 346m) annual, per ION Analytics
Process Timing	CEO flagged review Apr-2026; non-binding offers reported due mid-Sep-2026
Deal Structure	May be sold as one region-wide platform, or country-by-country to local players
Named Bidder	Siam Cement Group (SCG) reported in preliminary discussions

SELLER OVERVIEW

AkzoNobel is a global paints and coatings leader executing a portfolio reshaping program

USD 11.5bn

FY2025 group revenue

EUR 4.09bn

FY2025 Decorative Paints segment
revenue

15.8%

FY2025 Decorative Paints adj. EBITDA
margin

USD 12.5bn

Market capitalization

Recent portfolio actions

- Jun-Dec 2025: Sold 74.76% of AkzoNobel India to JSW Group for EUR1.4bn (25x EBITDA) — India liquid paints/coatings, incl. Dulux
- 2026: Rejected an unsolicited EUR7.5bn offer from Nippon Paint for the entire global Decorative Paints segment
- Apr 2026: CEO signaled review of Southeast Asia decorative paints businesses

Group revenue by segment, FY2025 (EUR bn)

Confirmed decorative-paints legal entities and manufacturing sites across all four markets

IN Indonesia PT ICI Paints Indonesia Tangerang (decorative) Est. 1971	TH Thailand Akzo Nobel Paints (Thailand) Ltd. Bangkok (decorative) Market entry 1963	MA Malaysia Akzo Nobel Paints (Malaysia) Sdn Bhd Site not confirmed this pass Formerly ICI Paints (Malaysia)	VI Vietnam Akzo Nobel Paints Vietnam Ltd. Ben Cat, Binh Duong (100m litre capacity) LEED Gold certified
--	---	---	--

Perimeter note: each market also hosts separate AkzoNobel Performance Coatings (industrial/powder) sites judged, as an analyst inference, to sit OUTSIDE the reported decorative-paints perimeter — see 01_Source_Data/SEA_Asset_Perimeter.xlsx.

MARKET CONTEXT

The ASEAN paints and coatings market is projected to grow at a ~5% CAGR through 2031

Growth drivers

- Robust construction activity across Indonesia, Vietnam and Thailand
- Government-backed infrastructure programs
- Regional industrial investment (incl. EV-related manufacturing)
- Rising urbanization and middle-class housing demand across all four markets

Nippon Paint holds the deepest regional overlap; AkzoNobel competes across a fragmented field

Company	Confirmed SEA Decorative Position
Nippon Paint	#2 in Malaysia decorative (26yr history); ~50% JV share in Thailand decorative; Vietnam production; Indonesia technical alliance
Local leaders	Thailand: Toa leads decorative, ahead of Nippon Paint's ~50%-share JV
Asian Paints / Berger	Asian Paints exited Indonesia (divested); Berger manufactures in Malaysia/Singapore, serves Indonesia/Vietnam
Siam Cement Group	Paint sold as one category within its broader Smart Living building-materials retail channel across all 4 markets
Sherwin-Williams / PPG	No SEA decorative market-share data identified — limited confirmed regional decorative presence

Source: search aggregation of company/trade-press disclosures — see 06_Buyer_Analysis/Buyer_Fit_Matrix for full evidence citations.

Illustrative revenue build reaches EUR381m by FY2030E on a ~5% CAGR

Key metrics (FY2026E)

- Revenue
EUR 315mm
- EBITDA (16.5% margin)
EUR 52mm
- Unlevered FCF
EUR 21mm (net of one-time separation costs)

EVERY figure on this slide beyond the EUR300m FY2025 revenue anchor is an ILLUSTRATIVE ASSUMPTION — no SEA-specific EBITDA, margin or cash-flow data is publicly disclosed. See 02_Financial_Model/README.

A scaled, multi-country decorative platform in a structurally growing region

1

Regional platform

Established decorative operations across four ASEAN markets with distinct legal entities and confirmed manufacturing footprint

2

Structural growth

ASEAN paints market projected to grow from USD7.78bn (2026) to USD9.92bn (2031), a ~5.0% CAGR

3

Optionality

Reported seller openness to a whole-region sale or country-by-country carve-up to local players maximizing synergy fit

4

Established brand

Dulux brand equity across all four markets, alongside Eka and other AkzoNobel decorative lines

5

Scarcity value

Few assets of this scale and multi-country reach become available in SEA decorative paints

6

Motivated buyer field

Multiple strategics (Nippon Paint, SCG, Asian Paints/Berger) have direct evidenced regional overlap or stated interest

Triangulated methodologies point to a recommended EUR500-775m Enterprise Value range

Recommended range

EUR500-775mm

Mid: EUR625mm | ~2.0x FY26E Revenue | ~12.0x FY26E EBITDA

Anchored on the DCF base case, cross-checked against the two most structurally comparable precedents (Sherwin-Williams/BASF Suvinil; Nippon Paint/AkzoNobel rejected global offer). Trading comps and JSW/PPG outliers treated as context, not primary drivers.

Six named strategics span pure-play coatings majors to a diversified regional conglomerate

JAPAN

Nippon Paint Holdings

Strongest evidenced SEA overlap

THAILAND

Siam Cement Group

Reported in preliminary discussions

INDIA

Asian Paints / Berger

Decorative pure-play, mixed regional footprint

USA

Sherwin-Williams

Largest balance sheet, limited SEA presence

USA

PPG Industries

Named in commentary; recent decorative divestiture

JAPAN

Kansai Paint

Regional presence, smallest balance sheet

Nippon Paint's deep overlap cuts both ways: highest synergy potential, highest regulatory risk

Buyer	Geographic Fit	Regulatory Risk	Financial Capacity
Nippon Paint	Strongest — all 4 markets	Highest — #2 Malaysia, ~50% Thailand JV share	Ample (EV ~USD21.4bn)
Siam Cement Group	Strong — full ASEAN retail network	Lower — paint not separately disclosed	Very large (~USD14.9bn revenue)
Sherwin-Williams	Weak — limited evidenced SEA share	Low — minimal existing overlap	Largest balance sheet (EV ~USD91.7bn)
Asian Paints/Berger	Mixed — Asian Paints exited Indonesia	Low — limited confirmed overlap	Strong (Asian Paints EV ~EUR24bn eq.)
PPG Industries	Unclear — no SEA-specific data found	Unclear	Ample (mkt cap ~USD24.5bn)

Illustrative synergy potential is highest for buyers with existing regional manufacturing scale

Methodology

- No buyer- or deal-specific synergy figure is publicly disclosed for this transaction
- Ranges sized using standard percentage-of-revenue M&A synergy heuristics, applied to each buyer's evidenced regional overlap
- Nippon Paint: highest cost synergy potential (manufacturing/distribution overlap in Malaysia, Thailand)
- SCG: revenue synergy from cross-sell through its existing building-materials retail channel

Two viable structures reflect the seller's reported openness to a whole-region or split sale

Option A: Single Regional Sale

- One buyer acquires all four country platforms as a combined SEA decorative business
- Simpler execution — single SPA, single diligence process, single close
- Best suited to a buyer with existing pan-regional infrastructure (e.g., Nippon Paint)
- Maximizes control premium if a strategic values the full platform

Option B: Country-by-Country Sale

- Each country sold separately to the local/regional buyer offering the greatest synergies there
- Explicitly contemplated in the ION Analytics reporting
- Allows SCG (Thailand-centric) and other buyers to bid only where they have the strongest fit
- More complex execution — multiple SPAs, parallel processes, potential timing mismatch across closes

Reported timeline points to non-binding offers due mid-September 2026

No signing, exclusivity or closing date is publicly disclosed beyond the reported NBO deadline. Timeline beyond mid-September 2026 is UNAVAILABLE / NOT PUBLICLY DISCLOSED.

KEY RISKS

Data scarcity, regulatory overlap and multi-country execution are the principal risk factors

Financial data scarcity

No SEA-specific EBITDA, margin, working capital or balance-sheet data is publicly disclosed — every valuation output rests on illustrative assumptions

Regulatory / antitrust

A sale to a buyer with deep existing overlap (e.g., Nippon Paint in Malaysia/Thailand) could face material merger-control scrutiny

Perimeter uncertainty

Whether Performance Coatings assets, shared services, or specific brands transfer with the decorative business is not confirmed

Multi-country complexity

A country-by-country sale structure multiplies regulatory approvals, SPAs, and closing-condition risk across four jurisdictions

Carve-out execution

TSA dependency, stranded costs and standalone systems build-out carry real integration risk not sized by any public disclosure

Valuation dispersion

DCF, trading comps and precedent transactions do not converge — a genuine finding that widens the defensible pricing range

VALUATION SENSITIVITY

DCF Enterprise Value ranges EUR468-908mm across a plausible WACC / terminal-growth band

WACC \ Terminal Growth	2.0%	2.5%	3.0%	3.5%	4.0%
7.88%	635	684	744	816	908
8.38%	583	624	672	731	802
8.88%	539	573	613	661	718
9.38%	501	530	564	603	649
9.88%	468	493	521	554	593

Enterprise Value, EUR mm. Base case (WACC 8.88%, terminal growth 3.0%) highlighted.

A staged, dual-track process balances platform value against structural flexibility

1

Broad outreach

Approach global strategics (Nippon Paint, Sherwin-Williams, PPG, Kansai Paint) and regional players (SCG, Asian Paints/Berger) in parallel

2

Dual-track structuring

Solicit both whole-region bids and country-specific bids to preserve the seller's stated optionality

3

Management presentations

Provide carve-out financials and perimeter clarity to shortlisted bidders — the single largest information gap identified in this project

4

Final bids and selection

Compare whole-region vs. split-sale proceeds net of execution complexity and closing-condition risk

Recommendation: prioritize Sherwin-Williams/Suvini-style structural comparables and Nippon Paint's evidenced regional scale as primary go-to bidders, while running SCG and Asian Paints/Berger as credible alternates.
